

Find out if
your kids toys
contain toxic
chemicals

HealthyToys.org

We tested 1,500 toys for toxic chemicals.
One in three toys we tested contained toxic chemicals.

What you should know...

Lead is Still in Toys – 20% of products we tested.

It's Not Just China – 16% of those from all other countries contained lead.

It's Not Just Lead – toys contain cadmium, mercury, arsenic, and bromine.

Jewelry – Children's jewelry is five-times more likely to contain high lead levels.

The Good News – 83% of toys contained LOW or NO levels of toxic chemicals.
